

LSC TRANSPORTATION CONSULTANTS, INC.

Resume

LESLIE SUEN, EIT

Education

Bachelor of Science – Environmental Engineering
California Polytechnic State University, San Luis Obispo

Certified Engineer in Training

Professional Registration/Membership

Institute of Transportation Engineers

Experience

Since joining LSC Transportation Consultants, Inc. as a Transportation Engineer in 2006, Ms. Leslie Suen has worked on a variety of traffic engineering studies in California, Idaho, Nevada, and Colorado. These analyses include the evaluation of existing traffic operations, level of service, trip generation estimates, accident data evaluations, parking studies, traffic calming measures, and signal warrants. Ms. Suen has employed a variety of traffic analysis software including Traffix, Highway Capacity Software, SIDRA, TransCAD, Synchro, and AutoTurn.

Ms. Suen's previous experience with a large manufacturing company in the environmental management department required that she train employees on incorporating environmental and legal requirements into their daily activities. She assisted engineers in air pollution management, solid waste reduction, wastewater treatment, and hazardous waste control. As a former employee of the Regional Water Quality Control Board in San Luis Obispo, California, Ms. Suen reviewed construction permits for the northern watershed department and assisted area engineers on various projects with data processing and research. As a Hydrologist Aid for the U.S. Forest Service in Dillon, Colorado, Ms. Suen investigated and reviewed a survey of abandoned gold and silver mines.
